**Step 1:**
- Choose the Interface from the drop down menu (i.e. Student Research Center, Kids Search, Searchasaurus, etc.)
- Check the databases to search from
- Check how to search
- You can limit the search by keyword

**Step 2:**
- Check IP Address

**Step 3:**
- Select Box Design

**Step 4:**
- Optional: You can customize parts of the layout such as size

**Step 5:**
- Preview and test your search widget here. If it doesn’t look or work the way you like, make adjustments in steps 1-4
- Select “Create Search Box” when you have made all your changes

**Step 6:**
- Highlight and copy the code from the box
7. Go to your LibGuide and add a new box. This should be a Rich Text box.
8. Select (add text) or (edit text) in the box
9. In the text editor choose plain text editor.
10. Paste the code from EBSCO in this box and click on Save Changes.
11. Now your users can search EBSCO databases from your LibGuide.
